

Introductory Webinar **Exploring the 13 Principles of Agroecology**

Wednesday, the 6th of October 2021 19:00 - 20:00 (CET)

Agroecology is a dynamic concept that has gained prominence in scientific, agricultural and political discourse in recent years. It is increasingly promoted as being able to contribute to transforming food systems by applying ecological principles to agriculture and ensuring a regenerative use of natural resources and ecosystem services while also addressing the need for socially equitable food systems within which people can exercise choice over what they eat and how and where it is produced.

Agroecology embraces a science, a set of practices and a social movement and has evolved over recent decades to expand in scope from a focus on fields and farms to encompass whole agriculture and food systems. It now represents a transdisciplinary field that includes all the ecological, sociocultural, technological, economic and political dimensions of food systems, from production to consumption.

In this webinar we will get insights into the development and definition of the 13 principles of agroecology and discuss how they can represent an operational framework for the agroecological transition in Europe and worldwide.

For this introductory webinar moderated by **Paola Migliorini**, we are pleased and honoured to count on the presence of Rachel Bezner Kerr, Fergus Sinclair and Alexander Wezel, three team members of the High Level Panel of Experts for Food Security and Nutrition Project - the foremost international science-policy interface of the Committee on World Food Security.

Join us and register **here!**

Fergus Sinclair World Agroforestry (ICRAF) Nairobi, Kenya

Rachel Bezner Kerr Leader of Systems Science at Professor of Global Development at Cornell University, USA

Alexander Wezel Vice-President of Agroecology Europe and Research Director at ISARA Lyon, France

MODERATOR

Paola Migliorini President of Agroecology Europe and Assistant Professor at the University of Gastronomic Science, Pollenzo, Italy

With the financial support from the LIFE Program of the European Union, the Fondation de France and the Fondation Ecotone
